DETAILED ACTION

1. The indicated allowability of claims 1-16 is withdrawn in view of the newly discovered reference(s) to Johnson et al. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1 and 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Johnson et al (US Patent 6,456,249).

Johnson et al disclose, in figure 17, an antenna assembly for wireless communication device comprising a signal ground 20, a monopole base element 17, a parasitic element 18, and a single matching element 164 connected between the parasitic element and the signal ground, see column 10, lines 14-36.

Allowable Subject Matter

4. Claims 2-9, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. Claims 12-16 are allowed.

Claim 12 recites the base element and the parasitic element which are substantially on top of one another as viewed along the direction of the normal of the circuit board. The patent to Johnson et al does not teach this limitation.

Claims 13-16 are allowed for depending on claim 12.
